

NEW NOMENCLATURE LEGENDA

The new names are basically made by **three parts**:

FIRST PART

Identification of group:

- **ST** for mix of *Streptococcus thermophilus* only

Mix of St and other thermophilic cultures:

- **SA** for mix of *Streptococcus thermophilus* and *Lactobacillus acidophilus*
- **SAB** for mix of *Streptococcus thermophilus*, *Lactobacillus acidophilus* and *Bifidobacterium*
- **Y** for mix of *Streptococcus thermophilus* and *Lactobacillus bulgaricus* (as the old SBS)
- **SC** for mix of *Streptococcus thermophilus* and *Lactobacillus casei*
- **SH** for mix of *Streptococcus thermophilus* and *Lactobacillus helveticus*
- **SL** for mix of *Streptococcus thermophilus* and *Lactobacillus lactis*
- **SR** for mix of *Streptococcus thermophilus* and *Lactobacillus rhamnosus*
- **SP** for mix of *Streptococcus thermophilus* and *Lactobacillus plantarum*
- **SLH** for mix of *Streptococcus thermophilus* and *Lactobacillus helveticus* + *Lactobacillus lactis*, i.e. for Emmental
- **SLHR** for mix of SLH + *Lactobacillus rhamnosus*
- **YH** for mix of *Streptococcus thermophilus*, *Lactobacillus bulgaricus*, *Lactobacillus helveticus*
- **YHL** for mix of *Streptococcus thermophilus*, *Lactobacillus bulgaricus*, *Lactobacillus lactis*, *Lb. helveticus*

Various mix of lactobacilli:

- **LH** for mix of *Lactobacillus helveticus*
- **LCH** for mix of *Lactobacillus casei* and *Lactobacillus helveticus* for yakult
- **LLH** for mix of *Lactobacillus lactis* and *Lactobacillus helveticus* for hard cheese
- **LHBS** for mix of *Lactobacillus helveticus* and *Lactobacillus bulgaricus*
- **LBS** for mix of *Lactobacillus bulgaricus*
- **LPR** *Lactobacillus plantarum* + *Lb. rhamnosus*
- **LR** *Lactobacillus rhamnosus*

Various mix of mesophilic cultures:

- **MO/MWO** for mix of mesophilic homofermentative (0 gas)
- **M/MW** for mix with cit+ or heterofermentative (Cit + or with gas)

Various mix of St and mesophilic cultures:

- **MOS** for mix of MO + *Streptococcus thermophilus*
- **MS** for mix of M + *Streptococcus thermophilus*
- **MF** for mix of M + *Lactobacillus fermentum*

Various mix of St, mesophilic and thermophilic lactobacilli:

- **MOT** for mix of MO + thermophilic cultures as Y, SL, SH etc.
- **MT** for mix of M + T

Probiotic cultures:

- **A** *Lactobacillus acidophilus*
- **B** Bifidobacteria
- **C** *Lactobacillus casei* and/or *Lactobacillus paracasei*
- **LPR** *Lactobacillus plantarum* + *Lb. rhamnosus*
- **LR** *Lactobacillus rhamnosus*

If *Enterococcus faecium* is present in the blend it will be added the letter **F** before the numbers
