THE CONVERGENCE OF
INTERNATIONAL BIOTECH
EXCELLENCE APPLIED TO THE
**FOOD, NUTRACEUTICAL AND
PHARMACEUTICAL INDUSTRY**

The graphic features a central text 'SACCO system' with 'SACCO' in large, bold, 3D-style letters and 'system' in smaller, lowercase letters below it. The text is surrounded by a network of white spheres connected by thin white lines. Four larger spheres are positioned around the central text, each containing a logo: 'CAGLIFICIO CLERICI' (top-left), 'SACCO' (top-right), 'Kemikalia' (bottom-right), and 'CSL' (bottom-left). The background is white with several smaller, out-of-focus white spheres scattered around.

SACCO system

Supporting food culture & life

“System” expresses the extraordinary synergy between four different companies: **Caglificio Clerici, Sacco, CSL, Kemikalia.**

A unique and functional network that maintains the characteristics and productive specificities of each entity.

Within the orbit of the **Sacco System** businesses revolve like autonomous satellites operating with absolute professionalism and flexibility, **to provide its customers with innovative and personalized solutions**, able to respond to the modern challenges of the Worldwide FOOD & HEALTH industry.

WELCOME TO OUR SYSTEM

FAMILY COMPANY

According to tradition and conviction, people and human relationships are the core of our business. All our partners become part of our family.

TRADITION AND EXPERTISE

Following a nearly 150 years long history, we continue growing qualitatively and technologically, keeping pace with the evolution of the market.

CREATIVE INTELLIGENCE

We are always looking for employees and collaborators with dynamic intelligences, having the capability of anticipating market trends and generating new ideas.

RELIABILITY

High-quality products, constancy of industrial performance, effectiveness of finished products and constantly improving results are always our objectives.

RESEARCH AND INNOVATION

Improving growth and progress in food and life industry are our goals, reached thanks to the perfect synergy between R&D and sales force.

KNOWLEDGE SHARING

We collaborate with the most prestigious research centers and with universities from all over the world for the development of our biotech sector.

FLEXIBILITY AND CUSTOMIZATION

We develop tailor-made solutions for each customer. Customer satisfaction, our vital lymph.

THE COMPANY SACCO SYSTEM

A COMPANY OF SACCO SYSTEM

From 1872 Caglifacio Clerici has been producing rennet in paste, liquid and powder.

Building on its glorious past, the company is now run by the fourth and fifth generation of the descendants of its founder, Martino Clerici. The adventure of a simple but brilliant man who over the years created the current Sacco System, system of companies.

A COMPANY OF SACCO SYSTEM

In 2013 Sacco acquired CSL, Centro Sperimentale del Latte, an Italian company founded in 1948, with the objective to study and enhance the value of lactic acid bacteria and other food grade microorganisms.

In line within the teachings of the founder, Dr. Leo Vesely, today CSL researches, develops, manufactures and sells probiotics, lactic acid bacteria, molds and yeasts, intended for the pharmaceutical, nutraceutical, dairy, food and agro-livestock sectors.

A COMPANY OF SACCO SYSTEM

Sacco is a biotech company that, has been on the international marketplace since 1934, as a producer and partner in the fields of research, scale-up, production and packaging of selected freeze-dried and frozen microbial cultures.

The Labware division develops and markets laboratory equipment, instrumentation, materials and reagents that are used in differing sectors, from food to pharmaceuticals, university and research.

A COMPANY OF SACCO SYSTEM

Already from 2006 Caglifacio Clerici had entered into the ownership of Kemikalia, the Swedish company, a market leader in the development, manufacturing and marketing of ingredients for the dairy food industry in Sweden, in the Nordic Countries and in other EU nations.

The expertise accumulated by the foundation from the early twentieth century until today is the foundation of its business, together with the development of new up to date technology.
